ABOUT ANNUAL REVIEWS

VALUE OF REVIEW ARTICLES WITHIN THE RESEARCH ECOSYSTEM

For more than 90 years, Annual Reviews has been dedicated to synthesizing and integrating knowledge for the progress of science and the benefit of society. Our journals support academics and students at all levels, and increase the discovery and understanding of vital research contributions. They are often described as required reading for the research community.

Annual Reviews Articles:

- Capture current understanding of a topic, including what is well supported and what is controversial
- Set the work in historical context
- Highlight the major questions that remain to be addressed and the likely course of research in upcoming years
- Outline the practical applications and general significance of research to society

WHO SHOULD READ ANNUAL REVIEWS JOURNALS?

- Researchers who want to keep abreast of their field and integrate this information with their own work
- Researchers who want an introduction to new fields
- Students at all levels who want to gain a thorough understanding of a topic
- Policy makers, practitioners, journalists, business people, patients, patient advocates, and others who wish to be informed about developments in research

SUBSCRIBE TO OPEN | Your Subscription Matters

Opening access to the knowledge generated by researchers from all disciplines is of immediate and practical application in creating and implementing solutions to the world's most pressing challenges. Nonprofit publisher Annual Reviews has pioneered the **Subscribe to Open (S2O)** model for open access. Below is a snapshot of our **S2O** progress.

Learn more at www.annualreviews.org/S2O

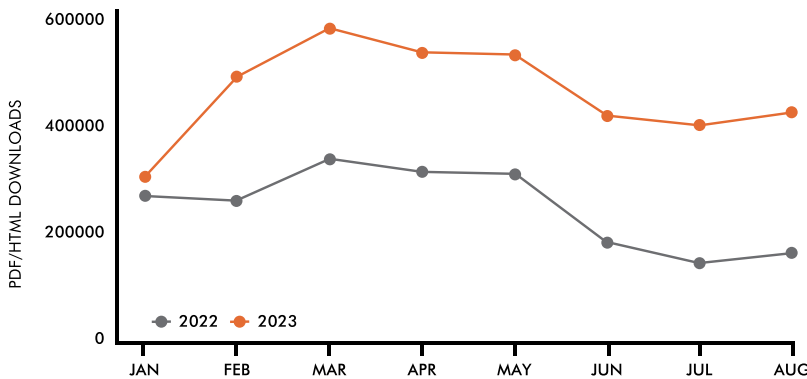

Subscribe to Open (S2O) is a business model that uses subscription payments to convert gated access journals to full Open Access (OA). The 2025 online volumes of all Annual Reviews journals will be offered under the **S2O** model.

Under **S2O**, institutional customers continue to subscribe to the journals that their patrons value. If support is sufficient, new volumes are published OA under a Creative Commons license; if support is insufficient, the paywall is retained. Thus, **S2O** is a subscription model, not a voluntary donation approach. It offers a partnership for rapid and equitable conversion to OA for readers and authors in all disciplines. **S2O** means the final article is immediately available with no access barrier and no author fee. **S2O** is equitable and inclusive, and available to all readers and authors, in all disciplines, in all countries.

S2O Increases Article Downloads

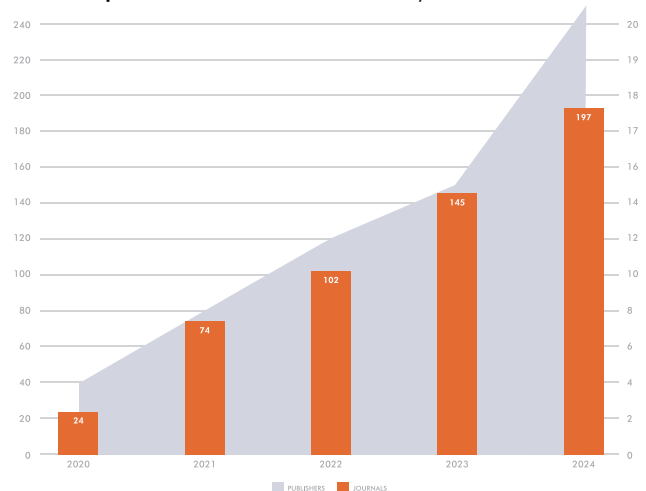

This graph shows downloads by month in 2022 and 2023 for 10* journals that were behind the paywall in 2022 and open access in 2023, supported by S2O. *Criminology, Entomology, Fluid Mechanics, Linguistics, Marine Science, Medicine, Organizational Psychology and Organizational Behavior, Pathology: Mechanisms of Disease, Pharmacology and Toxicology, and Psychology.

The **S2O** Community of Practice is a forum for publishers, librarians, funders, and vendors for sharing experience with the model, establishing definitions and boundaries for **S2O**. We welcome participation from librarians.

For more information about the **S2O** Community of Practice, see: www.subscribeoopencommunity.org

Adoption of S2O | Community of Practice

ACADEMIC TIER DEFINITIONS

Annual Reviews uses a tiered pricing model for academic institutions. We strive to provide value and make Annual Reviews widely available—our subscription prices remain among the lowest in the industry.

The needs of our customers differ by institution. Our tiered pricing model and collections recognize differences in demand for our publications and present fairer options for different-sized organizations.

TIER	USA: CARNEGIE CLASSIFICATION	REST OF WORLD ¹
1	Top 150 Academic Institutions, measured by research output ²	
2	15: RU/VH: Research Universities (very high research activity)	Highest Degree: Doctoral (very high research activity)
3	16: RU/H: Research Universities (high research activity) 25: Spec/Med: Special Focus Institutions—Medical schools and medical centers	Highest Degree: Doctoral (high research activity)
4	17: DRU Doctoral/Research Universities 26: Spec/Health: Special Focus Institutions—Other health professions schools	Highest Degree: Doctoral
5	18: Master's M: Master's Colleges and Universities (larger programs) 19: Master's M: Master's Colleges and Universities (medium programs)	Highest Degree: Baccalaureate/Associates
6	23: Bac/Assoc: Baccalaureate/Associate's Colleges 22: Bac/Diverse: Baccalaureate Colleges—Diverse Fields 21: Bac/A&S: Baccalaureate Colleges—Arts & Sciences 20: Master's: Master's Colleges and Universities (smaller programs) 1–14: Associate's Colleges	Highest Degree: Baccalaureate/Associates

¹ Institutions in countries outside the US and UK categorized as World Bank Middle- and Low-Income Countries will receive pricing directly from our sales team.

*Electronic Back Volume Collection

Consortia, Corporate, and Government organizations are invited to contact sales@annualreviews.org for more information and custom pricing.

BENEFITS OF SUBSCRIBING TO ANNUAL REVIEWS:

- Access to Reviews in Advance (articles available online prior to official publication date)
- Enhanced back volume availability
- Guaranteed permanent data rights
- Seamless access for everyone at your institution, wherever they are, whenever they need it
- With the success of **S2O**, articles by authors from your institution are published under a Creative Commons license without article processing charges (APCs)

"Most of us find ourselves buried amidst piles of unread papers. To keep abreast of the literature in biochemistry has become a Herculean task.... We hope, however, that the Annual Review will be of material assistance; for it is in the belief that critical surveys of the literature will minimize the task of constantly referring to original works, and that the *Annual Review of Biochemistry* will present from year to year reviews of the current developments of the major fields of interest."

Annual Reviews founder Dr. J. Murray Luck, *Annual Review of Biochemistry*, Volume 1, 1932

ELECTRONIC BACK VOLUME COLLECTION (EBVC)

Annual Reviews offers a comprehensive online collection of back volume content spanning the Biomedical, Life, Physical, and Social Sciences dating back to the very first volume of the ***Annual Review of Biochemistry*** in 1932.

ADVANTAGES OF EBVC

- Sciences Collection back volumes providing coverage from 1932
- 50% of our worldwide usage comes from the EBVC
- Immediate online access to more than 1,300 volumes, including more than 30,000 authoritative review articles
- Permanent data rights to back volume journal content for your institution
- One-time purchase with no maintenance fees
- Available via full-text, searchable PDFs
- COUNTER compliant usage statistics

Invest in the EBVC and connect with our experts from the past 90 years of Annual Reviews.

The EBVC provides the ideal way to build your institution's online collection by supplementing existing access to current content.
